

PARTNERSHIP INVITATION

A trusted partner for your patients' monitoring in Sweden

Fertilitet Plus is a private fertility clinic in Stockholm and Göteborg. We help patients treated at clinics abroad complete their ultrasound monitoring and blood tests in Sweden – reliably, personally, and without waiting times. We coordinate closely with your team so each patient's monitoring fits your protocol.

Why partner with us

Experienced team

A specialist team with over 30 years in fertility and recurrent miscarriage.

No waiting times

No referral needed and no queues – your patients are seen quickly.

Named contact

Coordination with your clinic and a person responsible for each patient.

YOUR CLINIC CODE (EXAMPLE)

Triangeln10

Every partner clinic gets a personal code. Your patients receive **10% off**, and it lets us see each referral came from you.

How it works – three steps

1

Your patient books

They book a consultation online and enter your code and their test protocol.

2

We plan the monitoring

A nurse or midwife reviews the protocol and plans the scans and blood tests, timed to the cycle.

3

We coordinate with you

We book and issue lab referrals. Results are delivered to the patient.

What we offer

- Ultrasound monitoring by a doctor (follicle & lining)
- Hormone & blood-test monitoring
- Sperm analysis (classic, extended & DNA fragmentation soon)
- Immunological & thyroid work-up
- Coordination with your clinic

Indicative costs

- Consultation – 1 200 kr
- Ultrasound – 1 900 kr
- Blood tests – priced individually
- Sperm analysis – from 2 200 kr
- Prices in SEK; lab costs added

Sperm analysis

The **classic sperm test (2 200 kr)** measures sperm count & concentration, motility, and morphology. The **extended test (3 800 kr)** also measures oxidative stress.

Coming September 2026: sperm DNA fragmentation testing (SDFR assay).

Please note: a few tests cannot be carried out with us, e.g. chlamydia and cervical/cell samples (cellprov).

Scope. We handle referral management and coordination of sampling; medical assessment and interpretation of results stays with the treating clinic. Results are delivered to the patient. **GDPR:** the protocol is shared during the consultation and in the patient's booking, never by email.

Let's partner

Get in touch and we'll set up your clinic's personal code.
